VIRTUAL EXHIBITION

EXHIBITION NOTE

A teacup can be part of someone's morning routine. A vase can remind someone of a gift they received years ago. A bowl of fruit might bring back memories of a kitchen, a family gathering, or a place they once called home. Objects can become part of our stories without us noticing

Still life gives artists a chance to explore these connections. It takes things we might otherwise overlook and makes us see them in a new light. Through an arrangement of objects, an artist can play with color, shape, and texture, or explore ideas that go far beyond what is placed in front of them.

There is also something fascinating about the choices behind a still life. Why these objects? Why this arrangement? What changes when a familiar item is placed in an unfamiliar setting? A simple composition can hold personal memories, cultural references, symbolism, or a story that each viewer reads differently.
